GHS

The Globally Harmonised System (GHS) of Classification and Labelling of Chemicals is implemented in the EU through the so-called [CLP-Regulation \(EC\) No 1272/2008](#). The regulations shall apply:

- to substances from 1 December 2010
- to mixtures (preparations) from 1 June 2015

We understand that Switzerland will also implement the GHS until 2015. Substances and mixtures which are not intended for the general public may already now be labelled according to the GHS ([ChemV, Art. 56a-e](#)).

Kolb is preparing for the introduction of the GHS. Details about our course of action and timing will become available through this site.
