### **Finance business partner (1 fte)**

#### **Job Description**

You will work within the finance department with an indirect line with Project Management Office organization and report directly to the Head of Finance & IT. Your main tasks will include performing detailed requirements analysis, documenting processes and developing the business cases for projects. To succeed in this role you should have a natural analytical way of thinking and be able to explain difficult concepts to non-technical users.

#### **Responsibilities:**

- Evaluating business processes, anticipating requirements, uncovering areas for improvement, and developing and implementing solutions.
- Leading ongoing reviews of business processes and track financial performance.
- Support prioritization of initiatives based on business needs and requirements.
- Align and monitor data between different databases.
- Calculation of new tariffs & cost prices after completion of projects.
- Documenting and communicating the results of your efforts.
- Effectively communicating your insights and plans to cross-functional team members and management.
- Ensuring solutions meet business needs and requirements.
- Supporting the project leader with the implementation of control plans and setting up the required reporting at the end of the project.

#### **As a candidate you have the following knowledge, experience and competences;**

- A bachelor's degree in business or related field.
- A minimum of 3 years of experience in business analysis or a related field.
- Exceptional analytical and conceptual thinking skills.
- The ability to influence stakeholders and work closely with them to
